

## Patient's Feedback – Autism- 2 years and 10 months

My autistic son made some big improvements. He used to never imitate. After 6 treatments of acupuncture with Dr. Tsai, one day he was watching TV, when the characters were stomping their feet for the “If you’re happy” song, he imitated and stomped his feet. Imitation is crucial of learning development. It is a good sign that he is improving.

Also, when his brother and sister were eating at the table, he usually does his own things. After Dr. Tsai’s treatments, one day, he got a chair and joined his brother and sister at the dining table. He was trying to interact with them.

Dr. Tsai is very skillful and knowledgeable. Thank you very much, Dr. Tsai.

Mrs. Lee (Mom)
